

The subject of physics is based on strong theoretical foundations and experimental findings. The department of physics is one of the oldest and established departments since 1999. The department has contributed towards the holistic development of the college. Our department is committed in imparting high quality education comprising elements of theoretical concepts, laboratory experiments and most importantly hands-on-experiments.

The department has two separate labs meant for doing practical of U.G courses. These labs are equipped with sophisticated apparatus.

LAB-1: This lab consists of a spacious room meant for doing practical. It is well equipped with all the necessary and sophisticated instruments like Travelling Microscopes. Telescopes, CRO's, Electrical and Electronic Instruments, A.C millivoltmeters, Battery Eliminators, Function Generators etc.

LAB- 2: It is also a spacious dark room meant for doing practical based on optics using Sodium and Mercury vapor lamps provided with equipment like Spectrometers, Gratings, Prisms, Polarimeters etc.
